## Required Elements Chart

**Plate-**Your plate number must be entered accurately. If not, you win. Ticket dismissed

**Expiration Date-**The expiration date of your registration must be entered correctly if it appears on the windshield or license plate of your chariot.

State-State of registration must be entered correctly

**Plate Type-**This is an easy element for a NY State charioteer, but not so easy for out-of-towners. The plate type must be an exact match for vehicles registered in NY State. However, a warrior is permitted to enter "N/S" if your plate type is not displayed on the plate. For example, New Jersey doesn't display plate type so technically, "N/S" will suffice...Arrgh!

**Make-**The Make of your vehicle must be described exactly as it appears on your NY State registration. Parking Ticket Warriors are permitted more leeway with out-of-state vehicles. The Make only has to be described, "reasonably accurate." This is a difficult standard to overcome for out-of-state parkers

**Body Type-**It is much easier for NY State chariots to beat their ticket when the body type is omitted, misdescribed or illegible than for out-of-state chariots. The standard of proof for out-of-staters is "reasonably accurate." Judges are reluctant to give the benefit of the doubt to out-of-state drivers

**Place of occurrence-**This is a description of the location of your parking space. Always check it for accuracy because if it is misdescribed, you win upon presenting the proper proof

**Rule-**Warriors must enter the correct reference to Rule 4-08 or else your ticket is dismissable upon application. For example, in the above parking ticket, the warrior referenced the correct rule for a fire hydrant violation, R. 4-08(e)(2). Please note that the violation code number is not a required element

**Date/Time-** Easy to check, not so easy to win a dismissal. Make sure you check when you see 12A (that denotes midnight) and when your parking space is subject to the 5-minute grace period.
